How: Adobe (IND + Illustrator + Adobe Capture)

When: 2023-2024

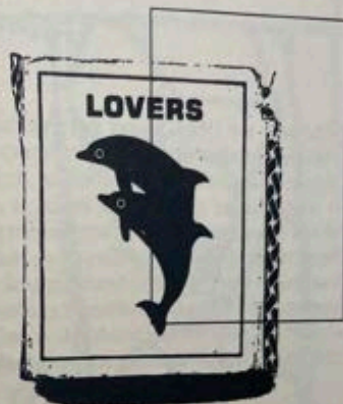

Notes: 220 page poetry and art book design and produced in hardcover. Design inspired by 20th century National Park advertisements, road maps, "vagabond" symbolism and municipal infrastructure imagery.

That'll be my day.
 Every terror I have,
 Someday — it'll hit me.
 (cool air evaporates)
 I won't have to act.
 It just hits me — boom,
 evaporates.

 The truth of
 catastrophe
 is something we dream of
 for
 years
 before it arrives:
 A bad dream of
 annihilation.
 Recurring in our

 prose
 Until it happens! For real this
 time.
 We want to be annihilated.
 This time, this time.
 it is going to happen.

Mythical Discourses

The discourse around Rio 2016, beginning with national identity themes, provided support for mega sporting events (MSEs) as a national duty by emphasizing an narrative of "urban modernization." The 2016 Olympic "logo" was created to evoke deep social and institutional modernization required ahead of the games, a rhetorical tool appealing to the patriotism of citizens. The project of development—exemplified by developments around the Olympic City—was a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse.

Development, Destruction, Displacement

Despite the urban construction plans, widespread displacement throughout the city. Displacement and institutionalized forms of violence were a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse.

Without that, no displacement is conceivable at least due to the impact of the city's right to urbanization. The Olympic City (OC) was a key theme of the discourse. The Olympic City (OC) was a key theme of the discourse.

| Notes: | Client wanted to maintain “seriousness” of a large financial institution while “winking” towards elements of internet culture, primarily vaporwave. Initial mockups focused on radial, circular designs, before moving to a final logo which was a simple recreation of a “penrose square”. Final deliverable included logos for two subsidiaries, powerpoint presentation slides, brand guidelines, fonts and color schemes, plus guidance for web master. |

| Notes: | <p>Design influence taken from sports team crests, particularly ACM “AC Milan”, which conveniently has the same acronym as “Abroad Complex Memphis”.</p> <p>Crest version was adapted into something that resembled an LP label, below.</p> |

I've participated in various capacities in the music industry since 2013: as a freelance journalist, DJ, radio host, designer for local show flyers, and as a manager for the Memphis rapper Lukah. My primary background being a writer and book producer, my strengths lie in pairing images and text, researching and identifying relevant source material, and simple digital tools such as Adobe Capture, which features prominently in my portfolio.

Music and album art have been crucial to my development as a creative professional since a young age, and so I thought I'd take this final section to point out trends I see emerging and diminishing in the next few years.

— In the last few years we saw portraits come back as a central design element, typically dramatically lit, often with vibrant colors, reminiscent of solo records from the 1970s and 80s, albeit with updating typography and lacking identifiers common on LP packaging, such as track listing. This is functional (a single image looks good on streaming services), but I think there is still a place for information on a record cover, particularly if it threatens to crowd and compete with other visual elements. The natural progression of this is towards staged images. As photographers and creative directors work in both fashion, corporate, and artistic context, competencies overlap: a scene is constructed similar to a music video set, with great attention paid to small details. See the recently released Perfume Genius cover for "Glory", photo produced by Cody Critcheloe (SSION).

— bulbous, liquid shapes and gradients have been completely subsumed into Millennial Product marketing and by now appear naive and occasionally gross. Likewise the faux-luxury blackletter scripts adapted for logos for Olive Oil, non-alcoholic mixers, and tinned fish companies, etc. On the internet, a design language adapted from illuminated manuscripts, proto-midieval imagery, and Dungeons & Dragons adjacent fantasy gaming has emerged on underground techno flyers. We will continue to see plenty of swords, unicorns, and some frogs and gnomes. Perhaps people will tire of Y2K "tribal" motifs and lazy tattoos.

— poor digital image quality continues to have its niche with experimental and DIY circles. The more obscure and indecipherable, the better. A complement to this is visual elements borrowed from or inspired by Outsider Art, employing mix media, crude illustrations.
